

Why Does YouTube App Keep Crashing?

Here's How to Fix It

Common Causes of YouTube App Crashes

Overheating, software bugs, server issues, and other factors can cause the YouTube app to crash on iPhones.

Steps to Resolve YouTube Crashes

Checking the server status, updating the app, restarting the iPhone, and other troubleshooting steps are necessary to address frequent crashes.

Fixing YouTube Crashes on iPhone

- Check YouTube's Server Status
- Allow Your iPhone to Cool Down
- Force Quit and Relaunch YouTube
- Restart Your iPhone
- Check Internet Speed
- Grant the necessary permissions.
- Reset Network Settings
- Check Storage Space
- Update YouTube Application
- Reinstall YouTube
- Update iOS
